

Panthera Dental formalizes its partnership with Cendres+Métaux.

Panthera Dental and Cendres+Métaux announce a Europe-wide technical/commercial joint venture.

Quebec, Canada – February 26, 2020 – Panthera Dental, world leader in CAD/CAM implant solutions, is proud to announce a partnership with Cendres+Métaux for the distribution of its prosthetic products in several European countries including France, Spain, England and Portugal. For many years, both companies have collaborated upstream in their respective manufacturing activities.

This partnership offers Panthera Dental enhance exposure in Europe and gives Cendres+Métaux the opportunity to expand its offer of products and services. The Swiss company can now meet all the needs of its clients in the field of modern dentistry.

“Cendres+Métaux is the ideal partner for our development in Europe. Now fully settled in our new headquarters, our installations and team members are prepared and ready to increase production and distribution around the world,” says Gabriel Robichaud, CEO of Panthera Dental.

“When we took stock of our digital services and the strings missing to our bow at the technological level, turning to Panthera Dental to complement our offering for laboratories seemed an obvious move to us. The level of precision required to manufacture customized implant devices entails high costs for low-volume production. It is therefore natural that two major players of the dentistry field should join forces to continue to offer high quality levels at competitive prices,” claims Ronald Lenzeder, Director of Cendres+Métaux Medtech.

By implementing its sales and logistics network, as well as its technical interface, Cendres+Métaux confirms its ambition to become a leader in implant-supported prostheses with an internationally recognized partner of choice.

About Cendres+Métaux

Founded nearly 135 years ago, the Swiss Cendres+Métaux Group, micromechanics and precious metal specialist, has since greatly diversified its activities to offer a wider range of products and services for laboratories and dental offices. Cendres+Métaux accompanies dental art professionals through out the manufacturing process of prostheses by proposing materials and processes that distinguish the company from major suppliers in the market. The Group is one of the most important subcontractors of the dental implantology market with an annual production in the millions of parts.
